

Flexi Delineators
 Brandsafe[®] Impact Protection

Features and Benefits

- Polyurethane posts that will flex, bend and crush, then return to shape
- Ideal where demarcation of traffic routes are paramount for safety
- 80mm diameter posts supplied with 3 floor anchor bolts
- Suitable for tarmac or concrete
- 1000mm high
- Choice of 3 high visibility colours
- Can be used on their own or with plastic chains

These flexi delineator posts are ideal where demarcation of traffic routes are paramount for safety. For example, they can help prevent cars cutting corners or driving through car parks.

The posts can be used on their own or combined with plastic chains. When used with chains, they can help segregate traffic and pedestrian routes.

Material Specification

Manufactured from polyurethane

1000mm high

80mm diameter
