

## Magnetic Wrap-around Pockets

### Features and Benefits

- Designed for industrial roll cages or mesh containers
- Available in sizes - A4, A5 and A6
- Manufactured from tough plastic
- Front flap to protect contents

Each hard wearing information pocket has a unique looped magnetic header that is designed to wrap around the mesh of a cage. A special flap shields the opening of each pocket providing your document with protection. The clear PVC face enables the message to be clearly seen without the need to remove the document. Longer headers suit trolley handles.

### Material Specification

#### PVC Pocket Upper Foil

Intermas PVC  
Thickness 180 micron  
Colour: Transparent

#### PVC Lower Foil

Como Nova PVC  
Thickness 350 micron  
Colour: Blue

Parameter	Specification
PVC	180 /350 micron
Temperature range	-5°C (materials become brittle) to + 30°C
Magnetic pads	500 micron
	Strontium ferrite in synthetic rubber
	Magnetized on one face A or B poles
Temperature range	-30°C to + 55°C (magnetic losses after 50°C)
Self-adhesive	Modified acrylic, polyester carrier
Temperature range	-30°C to + 175°C (applied at ambient)

### Magnetic Fixing

2 x Isotropic Magnetic Pads per fixing (A and B Poles) comprising of strontium ferrite in a synthetic rubber binder and magnetized on one face.

Temperature range: -30°C to 55°C (above 50°C magnetic losses occur).  
Long term heat exposure may result in discolouration of the product.

Attached to PVC with self-adhesive tape.
